

Understanding our Own Health is Difficult

Even with such advanced technology and data systems, we are unable to comprehend our own health status. We don't know how to improve our health, how diseases manifest in our body over time, or how our everyday decisions can affect our future.

Implementing AI and Data Analysis to Help

iCarbonX is leading the vision where everyone is able to drive their own health and defeat disease with the help of advanced data and AI. They are working to create a platform to allow the general public to have a map to show them where they are in terms of their health.

Our Platform

Meum is a health management platform that creates your digital profile so that you can understand and monitor your current health status and predict future trends.

FitForce

FitForce provides genetic questionnaires and tests, customizable workouts, fitness data tracking and forecasts, and partner offers for individuals keen on bettering their fitness and exercise.

MeumSpring

For adults who desire to improve their skin quality, MeumSpring provides tests to analyze skin characteristics and personalized product recommendations based on test results.

Precision Nutrition

Precision Nutrition, a personal dietary guide, provides tests, recordings, and consultation services along with personalized nutrition packages for those who want to improve their eating habits.

Features of Meum

Services

Continuous Health Characterization

Scalable and biological measures to digitize all aspects of human life.

Integrated platform

Individuals can manage their digital health profile, learn from others, and discover new options for themselves.

Precision and high value

iCarbonX provides applications across lifestyle, wellness and healthcare directly to consumers, coaches, physicians and employers.
